-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 22 August 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Status of the Claims***

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Huggins (5,845,064).

Claim 3 is objected to.

Claims 4-20 are allowed.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Huggins (5,845,064).

Regarding claim 1:

Huggins teaches:

An apparatus for verifying correctness of a behavioral model of a microcode machine (Title), the microcode machine operable in a native state and an emulated state, the apparatus, comprising:

means for producing the native state (col. 2 lines 40-43 and col. 4 lines 2-4 – the model of the design is a means for producing the native state);

Art Unit: 2113

means for producing the emulated state (col. 2 lines 40-43 and col. 3 lines 63-67 – the C language reference model is a means for producing the emulated state); and means for comparing the native state and the emulated state (col. 2 lines 43-45 and col. 4 lines 63-67).

Regarding claim 2:

Huggins teaches:

wherein the behavioral model comprises one of a hardware description language and a processor (col. 4 lines 2-4).

### ***Allowable Subject Matter***

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Prior art was not found that explicitly teaches or fairly suggests executing a sequence of microinstructions generated from microcode taken from a microcode storage in order to produce the native state and executing a macroinstruction corresponding to the microinstruction sequence in order to produce the emulated state as outlined in claim 3. Prior art was not found that explicitly teaches or fairly suggests determining if a macroinstruction to be executed is a native instruction; if the macroinstruction is a native instruction, executing the native instruction, the execution

Art Unit: 2113

producing the native mode state of the processor; if the macroinstruction is not a native instruction: fetching the macroinstruction, providing microinstructions corresponding to the macroinstruction, and executing the microinstructions, the execution producing the native mode state of the processor as outlined in claim 4. Prior art was not found that explicitly teaches or fairly suggests checking the native mode state and the emulated state against the behavioral model as outlined in claims 12 and 17.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
